I. Applicant

Company:

Contact person:

Street:

City/Country:

Phone:

Fax:

Member of the BWP: YES NO

2. Name of the models or series to be tested

(Only devices with identical controls and the same heat source may be listed in the same application. For devices with different controls or heat sources, a separate application is required. For series, the names of the associated models must also be listed.)

Series: _____

Model(s)	
1	10
2	11
3	12
4	13
5	14
6	15
7	16
8	17
9	18

3. Measurement and control

The heat pump can be switched into the following operating states:

Operating state (with terminal solution)	YES	NO
Operating state 1 (1:0): Deactivation of the heat pump (switch-off command; max. 2h blocking time)		
Operating state 2 (0:0): Normal operation with partial heat storage filling (for max. 2h power supply lock)		
Operating state 3 (0:1): Intensified operation mode for heating and hot water preparation within the settings of the controller (switch-on <u>recommendation</u>)		
Operating state 4 (1:1): Intensified operation mode for heating and hot water preparation within the settings of the controller (switch-on <u>command</u>)		
Notes:		

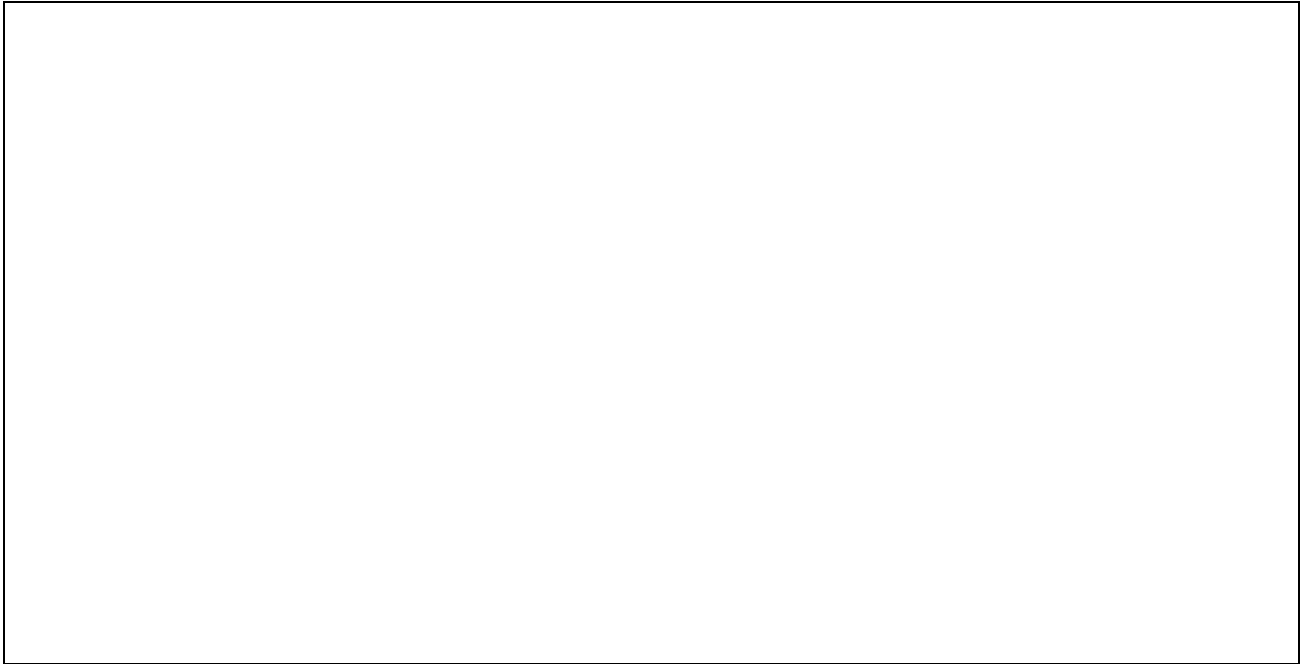

The present room temperature serves as a reference variable for the system temperature control (OPTIONAL)?

YES

NO

Description / schematic of the board element

(Alternatively, the corresponding section of the operating manual can be attached in electronic form.)

4. Heat source

The models or series presented use the following heat source:

Air:

Geothermal energy:

Water:

Other:

In case of approval, an SG-ready label will be issued for each heat source separately.

Declaration of self-commitment of the applicant

The applicant hereby confirms in a legally binding manner that the controller described in this application is used for all models and series for which he hereby applies for the "SG Ready" label and that all information provided is truthful.

The applicant further declares that the information and documents submitted are complete and correct.

The applicant acknowledges the validity of the "SG Ready" regulations in the version valid at the time the application is made and pledges to comply with them for the entire term of the label.

The applicant acknowledges the validity of the "SG Ready" fee regulation in the version valid at the time the application is made and pledges to pay the expense allowance specified therein.

The applicant declares that the heat pumps or series submitted by him for labelling comply with the regulations of the "SG Ready" label in the version valid at the time of application. He undertakes to send all changes to the label commission without being asked.
